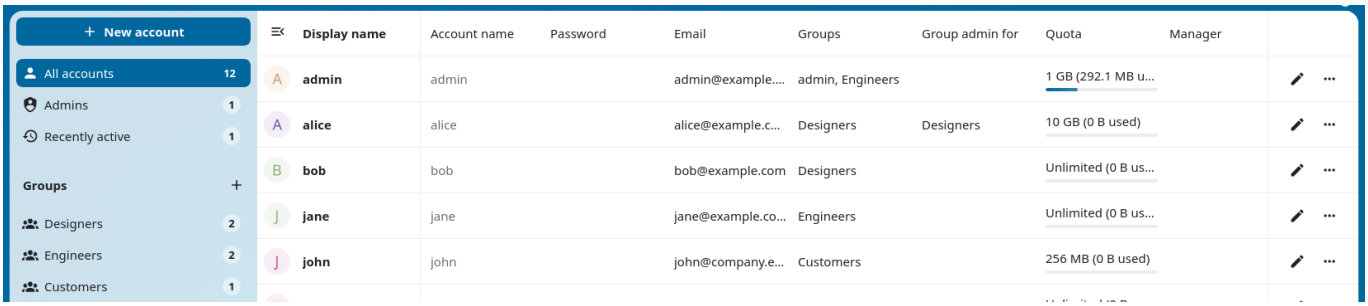
Registering Users and Organizing Classes

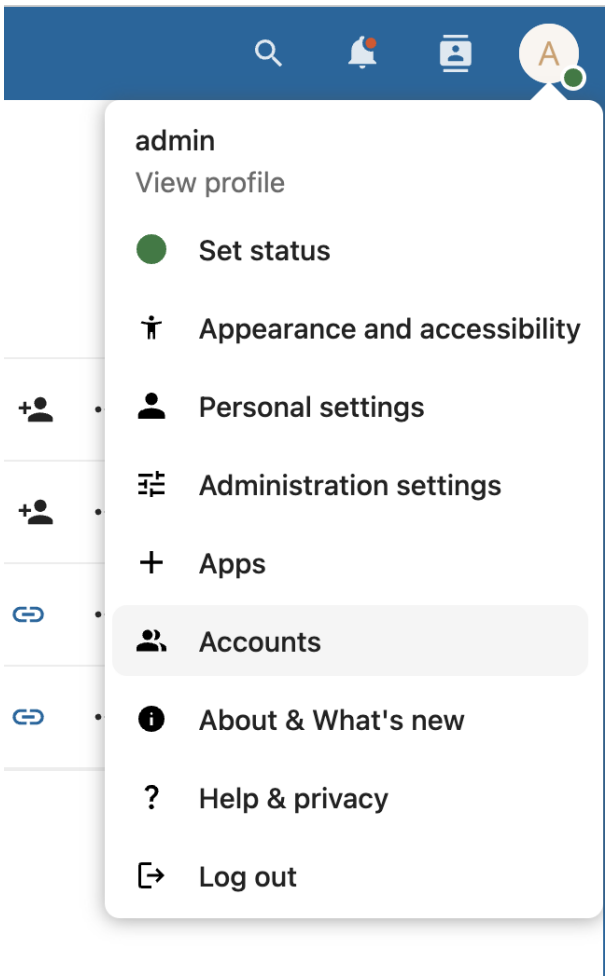
Creating digital identities on the Appnet



To begin, you must access the Accounts dashboard.

Accessing the Accounts Dashboard

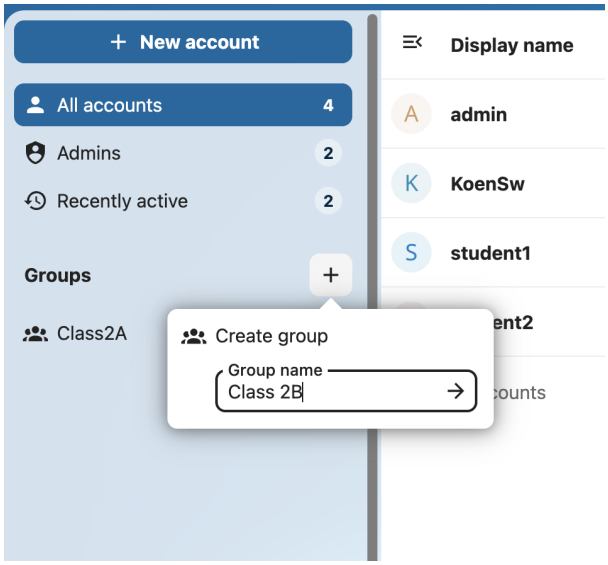
1. Look at the top-right corner of your screen.
2. Click your **Profile Picture/Icon**.
3. **Action:** Select **Accounts** from the dropdown menu.



Creating a "Class" (Group)

Goal: Organizing students into a single class for easy sharing.

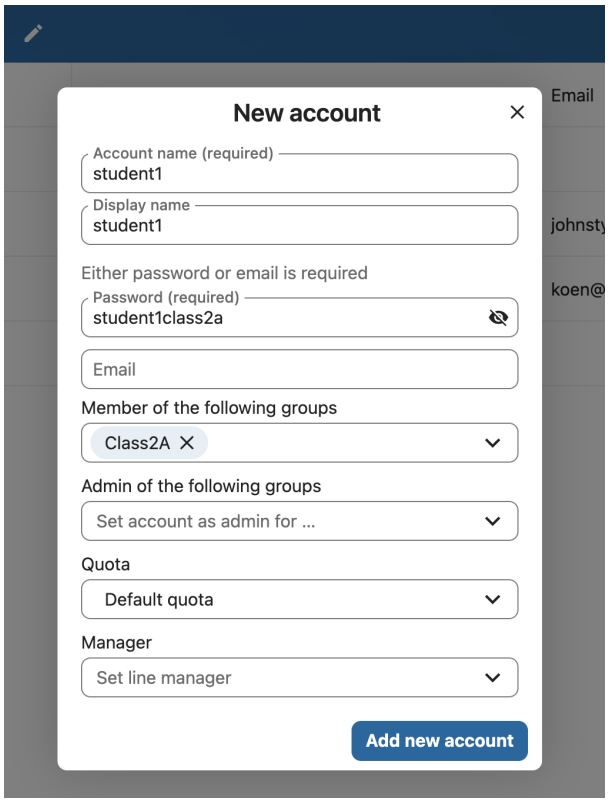
1. On the Users page, look at the **Left Sidebar**.
2. Click the **+** button at the right of **Groups**.
3. **Action:** Type the group name (e.g., "Class 2B") and press Enter.



Registering a New Student

Goal: Create the digital account for a student.

1. Click the **+ New account** button (Top Left).
2. Fill in the **Account name** (e.g., `s.smith`).
3. Fill in the **Display name** (e.g., `Sarah Smith`).
4. Fill in a temporary **Password** (the student can still change this)
5. Add the Classes (groups) that this student will participate in
6. Click the Add new account button.



Summary: The Power of Groups

- **Without Groups:** You must share a file 30 times (once for each student).
- **With Groups:** You share a folder **once** with "Class 2A".
- **Result:** Nextcloud automatically grants access to every student inside that group instantly.

Student Mobile Access

Action: Connecting a tablet or phone.

1. Look at the top-right corner of your screen.
2. Click your **Profile Picture/Icon**.
3. **Action:** Select **Personal settings** from the dropdown menu.
4. Click on the **Mobile & desktop** button.
5. Follow te instructions on the screen to install and configure the mobile app.

Get the apps to sync your files
Nextcloud gives you access to your files wherever you are. Our easy to use desktop and mobile clients are available for all major platforms at zero cost.
Desktop app
Windows, macOS, Linux
ANDROID APP ON
Google Play
AVAILABLE ON
F-Droid
Download on the
App Store
Set up sync clients using an app password. That way you can make sure you are able to revoke access in case you lose that device.
Connect other apps to Nextcloud
Besides the mobile apps and desktop client you can connect any other software that supports the WebDAV/CalDAV/CardDAV protocols to Nextcloud.
Connect your calendar
Connect your contacts
Access files via WebDAV
Server address
Use this link to connect your apps and desktop client to this server:
